

LOIVA®

Manufactured By:

NKNi (Korea)

LV-8000

FABRIC FOLDING DEVICE FROM ROLL TO TUBULAR FORM

Application:

It is used to fold the fabric from roll form to tubular form & feed continuously to LV-8500.

LV-8500

SINGLE NEEDLE MACHINE TO EDGE STITCH OF TUBULAR FORM FABRIC WITH PULLER

Application:

It is used to stitch the side of continuation fabric after alignment & edge cutting of tubular form fabric.

- * Wide puller.
- * Fabric lay device
- * Suction device to collect the waste
- * Pneumatic edge guide to control edges.

LOIVA[®]

Manufactured By:

NKN (Korea)

LV-2000

CNC CONTROLLED ROLL SLITTING/ CHOPPING MACHINE

Application:

It is used to cut the roll automatically into different width after programming. This is servo motor controlled fully programable for automatic mode.

- * The least count is 0.01mm.
- * Knife grinding system.
- * Auto knife dia control.
- * Unique design of four jaw chuck.
- * Power supply suitable for any country as required.
- * X & Y axis also controlling by servo motor.

LV-3000

BIAS SLITTING & ROLL WINDING MACHINE

Application:

It is used to rewind the fabric after slitting the tubular form fabric into Bias in any angle.

- * Different angle adjustment.
- * Air blow system is provided for proper feeding.
- * Roll winding tightness system provided for tight roll.
- * Variable feed control of fabric for Bias cutting.
