

LOIVA®

Manufactured By:

NKNI (Korea)

MC-7800-3 Production Counter

Application:

Production Counter is used to check the real-time status of the production batchwise.

Features:

- * **CONTROLLED BY REMOTE &** Very easy to set the counter.
- * **ACCURATE TIME SCHEDULE:** User only have to enter the intervals (like- Start time, tea break, start time, lunch time, start time, evening tea break, start time, end time), daily production target & current time. The counter will automatically display the present target & present status.
- * **SEMI-PERMANENT BUILT-IN BATTERY:** Semi-permanent built-in battery keeps time continuous, even if power supply will stops.
- * **WORKING PROCEDURE NOTIFICATION ALARM:** Counter have two alarm lights on the bottom, Green light for planned productivity (when present status cross the present target) & Red light for lack of productivity (when present status is less than present target).
