

# LOIVA®

Manufactured By:

**NKNI** (Korea)

## MJ-3700-2 Vaccum Board Attachment

### Application:

It is used to crease the pockets, collar bottom, yokes etc accurately by using steam. This is an attachment can be attached to any make vaccum table with steam iron.

The template is made by transparent fibre sheet & can be cut by normal scissor and it doesn't get heated by the iron temperature. Also can be used for cuff & collar blocking.

### Control Panel

User-friendly with three different mode

- \* Mode-1 : Double Operation
- \* Mode-2 : Double Operation (By turns)
- \* Mode-3 : Single Operation

VERY FAST & EASY
